A

Acid pump, soil zone, 241
Acid rain, 239
Activity, 90
Activity coefficient, 90-91
Actual evapotranspiration, 207, 231
Adsorption of ions (see Ion exchange)
Advection, 75, 389, 397, 550
Advection-dispersion equation, 389, 395, 402, 549-553
Aeolian deposits, 149
Age dating (see Dating of groundwater)
Air entrapment during infiltration, 230-232, 369
Air entry pressure head, 41
Airphoto interpretation, 307
Alluvial deposits, 147
Alternating direction implicit procedure, 355
Ammonification, 413
Analog simulation:
  aquifer, 359-364
  conductive-paper, 179
  flow net, 178-181
  resistance network, 180
  resistance-capacitance network, 359-364
  steady-state, 178-181
  transient, 359-364
Angle of internal friction, 466
Anion, 84

Anion evolution sequence, 241-244
Anion exchange (see Ion exchange)
Anisotropy:
  in compressibility, 56
  in dispersion process, 394
  flow-net construction, 174-178
  of fluvial deposits, 148
  in hydraulic conductivity, 32
  of sandstone, 153
Anticline, 156
Aquiclue, 47
Aquifer:
  aeolian deposits, 149
  analog simulation, 359-364
  artesian, 48, 199
  barometric efficiency, 234
  bounded, 330-331, 346, 349
  carbonates, 154-157
  coal, 157
  coastal, 375
  compaction, 57, 59
  compressibility, 56
  confined, 48 (see also Confined aquifer)
  defined, 47
  fluvial deposits, 147-148
  glacial deposits, 149-152
  ideal, 314
  igneous and metamorphic rocks, 158-163
  leaky, 320-324, 345, 346
  lithology, stratigraphy, and structure, 145, 306
Aquifer (cont.):
- numerical simulation, 352-359, 546-548
- perched, 45, 48, 210
- permafrost, 163
- response to pumping, 314-335, 343-350, 352-364
- sandstone, 152-154
- seawater intrusion, 375-378
- unconfined, 48 (see also Unconfined aquifer)
- yield, 305, 352-364

Aquitard:
- compaction, 323, 332-334, 371
- defined, 47
- glacial till, 150
- land subsidence, 372-375
- lithology, stratigraphy, and structure, 145
- loess, 149
- response to pumping in adjacent aquifers, 323, 332-334, 371
- shale, 158
- storativity, 61
- transmissivity, 61

Arch dam, 476
Artesian well, 48, 199
Artificial recharge, 230, 367-370
Assiniboia, Saskatchewan, regional flow, 201
Atmospheric pressure, 19, 21, 39, 230, 233
Average linear velocity, 71, 76, 391, 427

B

Bacteria, 117, 121-123, 246, 386, 441
Bacteriological water quality standards, 386
Bail test, 339
Bank storage, 225-226, 230
Barometric efficiency, 234
Baseflow:
- defined, 4
- hydrograph, 209-210, 222
- in hydrologic budget, 206
- recession curve, 225-226
Basic time lag, 340
Basin yield, 305, 364-367
Batch experiments, 433
Bernoulli equation, 21

Biscayne aquifer, Florida, saltwater intrusion, 377
Borehole dilution method, 342, 428
Borehole drilling, 307, 312-314
Borehole geophysics, 309-312
Boundary-value problem:
- defined, 67-69
- for one-dimensional consolidation, 333
- for one-dimensional infiltration, 212
- for one-dimensional mass transport, 391
- for radial flow to a well, 316
- for steady-state regional groundwater flow, 542-543
- for steady-state uniform flow, 534-535
Bounded aquifer, 330, 346, 349
Breakthrough curve, 391
Brine, 243, 293, 377
Bubbling pressure, 41
Bulk mass density, 337
Buoyant density, 482

C

Cable-tool drilling, 312
Calibration of aquifer models, 358
Caliche, 519
Capillary fringe, 44 (see also Tension-saturated zone)
Carbon, dissolved inorganic, 86, 99, 101
Carbon dioxide:
- in groundwater, 95-96
- in soil zone, 95-96, 240-243, 255-257, 280
Carbon-14 dating, 134-135, 201, 266, 290-292
Cation, 84
Cation exchange (see Ion exchange)
Cation exchange capacity, 128
Caves, 513-515
Characteristic curves, 41-43, 62, 185, 339, (see also Unsaturated flow)
Charge balance equation, 96
Charge balance error, 97
Chebotarev sequence, 242
Chemical equilibrium (see Equilibrium)
Chemical partitioning, 402–408, 432–434
Chemistry of water, 81–141, 238–297 (see also Hydrochemistry)
Clay minerals, 128–129, 133, 270, 287, 293
Closed-system dissolution, 109, 256–257
Coal, 157, 289
Coalification, 289
Coefficient of compressibility, 338
Coefficient of consolidation, 33, 339, 372
Coefficient of hydrodynamic dispersion, 389 (see also Dispersion coefficient)
Coefficient of molecular diffusion, 103, 390 (see also Diffusion coefficient)
Coefficient of permeability, 27 (see also Hydraulic conductivity)
Cohesion, 466
Colloids, 127
Columbia River plateau, Washington, 162
Column experiments, 390, 433
Common-ion effect, 112
Compaction, 57, 59, 323, 332–334, 371
Compaction recorder, 374
Complementary error function, 391–393
Compressibility: aquifer, 56
coefficient of, 338
from compaction recorder installations, 375
laboratory measurement, 337–339
porous medium, 54, 337–339
range of values, 55
units, 52, 56
water, 51, 59, 529
Compression index, 338
Computer models (see Numerical simulation)
Concentration gradients, 25, 103, 388–413
Concentration units, 87–88
Concrete dam, 476–481
Conductive-paper analog, 179
Cone of depression, 318, 320
Confined aquifer:
analog simulation, 360
defined, 48
diffusion equation, 65
geology, 145
numerical simulation, 353
piezometer test, 341
pumping test, 343–349
radial flow to a well, 315–324
storativity, 59–61
transmissivity, 59–61
water-level fluctuations, 230–232
Congruent dissolution, 107
Conjunctive use, 367
Connate water, 519
Consolidation, 54, 333, 371
Consolidation grouting, 479
Consolidometer, 338
Constant-head boundary, 169, 193, 331, 370
Constant-head permeameter, 335
Contaminant plume, 396, 400, 437
Contamination of groundwater:
advective-dispersion equation, 389, 395, 402, 549–553
from agricultural activities, 442–444
arsenic, 420
from deep-well disposal, 454–456
from detergents, 440
from fertilizer, 442
fluoride, 421
in fractured rocks, 408–413
heavy metals, 416–420
in heterogeneous media, 397–402
mercury, 417
from mining activities, 457
nitrogen, 413–416, 442
organic substances, 424–426
pesticides, 425, 443
from petroleum spills, 444–447
phosphates, 422
from radioactive waste, 447–454
reactive constituents, 402–408
in regional flow systems, 401, 406–407
retardation, 404–410, 552
from road salt, 456
from sanitary landfills, 434–442
from sewage, 439–442
trace metals, 416–420
trace nonmetals, 420–424
transport processes, 388–413, 549–553
Contamination of groundwater (cont.):
water quality standards, 385–388
Convection, 508 (see also Advection)
Conventional method of slices, 468
Cooper-Papadopoulos slug test, 341
Counterions, 127
Coupled flow, 25–26
Crank-Nicholson scheme, 548
Curtain grouting, 479

D
Dalton’s law of partial pressures, 95
Dams, 475–484
Darcy flux, 17, 71, 170, 203
Darcy velocity, 17, 34
Darcy’s law:
defined, 16, 27, 28
electrical analog, 179
infiltration, 212
limits, 72–75
three dimensions, 34–35
Dating of groundwater:
by carbon-14, 134–135, 201, 266, 290–292
by tritium, 136
Debye-Hückel equation, 90, 536
Deep-well disposal of waste, 454–456
Deforming coordinate system, 66, 531
Delay index, 325
Denitrification, 118, 415
Density:
bulk, 337
buoyant, 482
mass, 19, 23, 52, 376, 529
weight, 23, 529
Depression-focused recharge, 217, 226
Deuterium, 82, 137
Dewatering, 492–494
Diffusion, 75, 103–104, 297, 390–393, 411, 550
Diffusion coefficient:
in porous media, 104, 390, 393
in water, 103
Diffusion equation, 65, 315–316, 531–533
Diffusivity:
hydraulic (saturated), 61
soil–water (unsaturated), 62
Dilatancy model, 502
Dimensions and units, 526–528

Discharge:
as baseflow, 225–226
defined, 211
as evapotranspiration, 231
in hydrologic budget, 203–210, 365
specific, 16, 23, 34, 71
Discharge area, defined, 194
Discontinuous heterogeneity, 30
Disequilibrium index, 112 (see also Saturation index)
Dispersion:
hydraulic, 75
hydrodynamic, 75, 388–413, 550
longitudinal, 76, 388–413
mechanical, 75, 396
transverse, 76, 394
Dispersion coefficient:
defined, 389
longitudinal, 388–396
three-dimensional, 395, 552
transverse, 394, 396
Dispersivity:
defined, 390
effects on concentration gradients, 392
field measurement, 431
laboratory measurement, 430
values, 400
Dissolution of minerals:
aluminosilicates, 270
carbonates, 108–112, 254–268, 280, 284, 288
closed-system, 109, 256–257
congruent, 107
gypsum, 108, 243, 282
halite, 244
incongruent, 107, 257–259, 272
laboratory experiments, 273–275
open-system, 109, 254–256
Dissolved gases, 86, 95–96, 140, 241, 245, 439
Dissolved inorganic carbon, 86, 99, 101, 291
Dissolved oxygen, 140, 245
Distributed-parameter approach, 206
Distribution coefficient:
defined, 403
effect on concentration gradients, 406–408
in fractured rock, 410
Distribution coefficient (cont.):
  measurement, 432-434
Dolomite (see Limestone)
Drainage:
  of dam foundations, 479
  of excavations, 491-496
  of tunnels, 487-491
Drainage basin, 4, 205, 365
Drawdown cone, 318, 320
Drawdown formulas, 314-335
Drillability, 313
Drilling methods, 307, 312-314
Drilling mud, 313
Drinking water standards, 386
Drying curve, 41
Dupuit-Forchheimer theory, 188-189, 226
Durov-Zaporozec diagram, 250

Earth dams, 476, 481-485
Earthquakes:
  effect of reservoir impoundment, 487
  effect on water levels, 230, 234
  failure of earth dams, 483
  prediction and control, 500-502
  role of groundwater in generation, 498-500
Economic mineral deposits, 519
Effective grain size, 350
Effective permeability, 46
Effective stress:
  atmospheric pressure effects on water levels, 233
  compressibility measurement, 337
  defined, 52
  due to external loads, 234
  in earthquake generation, 499
  beneath glaciers, 517
  in land subsidence, 372
  in petroleum migration, 503
  salt filtering, 295
  slope stability, 467
  unsaturated zone, 57
Effluent stream, 205
Eh, 120-121, 141, 244-247 (see also pE)
Eh-pH diagrams, 123-126, 247
Elasticity modulus, 51

Electric log, 310
Electric analog models (see Analog simulation)
Electrical conductance, 84, 139
Electrical resistivity logging, 310
Electrical resistivity survey, 309
Electrochemical evolution sequence, 244-247
Electrokinetic soil drainage, 25
Electroneutrality equation, 96
Elemental control volume, 63, 531
Elevation head, 21-23
Ellipsoid of hydraulic conductivity, 35, 175
Environmental isotopes, 134-139, 201, 221-224
Enzymes, 117, 122
Equation of continuity, 64, 65, 531
Equation of state for water, 52, 531
Equations of groundwater flow, 63-67, 316, 551-553
Equilibrium:
  chemical, 89-96
  stable, 91
  unstable, 91
Equilibrium constant:
  albite-kaolinite, 107, 271
  calcite, 108-109, 258
  carbon dioxide, 95, 109
  carbonic acid, 99, 109
  defined, 89, 94
  dolomite, 108-109, 258
  gypsum, 107
  hydroxylapatite, 423
  ion-exchange reactions, 129
  quartz, 269
  redox reactions, 119-126
  strengite, 423
  values, 106
  varisite, 423
  water, 98
Equilibrium methods of slope stability analysis, 467
Equipotential line, 25 (see also Flow net)
Equivalents per liter, 87
Equivalents per million, 87
Erosion, 515
Error function, 539
Evaporation (see Evapotranspiration)
Evaporites, 519
Evapotranspiration, 4, 205-207, 211, 230-231
Exfiltration, 211
Exit point, 187, 481
Exploration for aquifers, 304–314

F

Facies, 250
Factor of safety for slopes, 470, 472
Fairbanks, Alaska, permafrost, 165
Fair-Hatch equation, 351
Falling-head permeameter, 336
Faraday constant, 121
Faults, 145, 474, 490, 498
Fence diagram, 252
Fick’s first law, 103
Fick’s second law, 104
Filtration ratio, 294
Fingering, 400
Finite-element methods, 184, 356, 377, 400
Fixed-ring consolidometer, 338
Floating-ring consolidometer, 338
Floridan limestone aquifer, hydro-chemistry, 261–268
Flow net:
by analog simulation, 178–181
anisotropic systems, 174–178
under a dam, 50, 68, 171, 477–481
defined, 25
Dupuit-Forchheimer, 187–188
by graphical construction, 168–178
heterogeneous systems, 172–174
homogeneous, isotropic systems, 168–172
by numerical simulation, 181–185
qualitative, 173
quantitative, 170, 203
regional groundwater flow, 193–211
saturated-unsaturated, 185–187
for slope stability, 470
around a tunnel, 488
Flow system, local, intermediate, and regional, 196
Flow tube, 169
Flowing artesian well, 48, 199
Flowline, 25, 36, 50, 177
Fluctuations in water level, 215, 229–234, 366, 472
Fluid mechanics, 526–530
Fluid potential, 18–23 (see also Head)

Fluid pressure, 19–23, 529 (see also Pressure head)
Fluvial deposits, 147–148, 516
Fluvial geomorphology, 516
Flux (see Darcy flux)
Forced convection, 508
Fractured rocks, 73, 154–162, 297, 408–413, 472–475
Free convection, 508
Free energy:
Gibbs, 91
standard, of formation, 93
standard, of reaction, 93
Free surface, 188, 481, 494
Freundlich isotherm, 403

G

Gage pressure, 21, 529
Gas constant, 93, 120
Gauss-Seidel method, 184 (see also Overrelaxation)
Geochemical anomalies, 521
Geochemical exploration:
ore deposits, 521
petroleum, 507
Geochemistry of water, 81–141, 238–297, 384–457 (see also Hydrochemistry)
Geologic maps, 306
Geomorphology, 513–519
Geophysical logs, 309–312
Geophysical surveys, 308
Geotechnical problems, 464–496
Geothermal gradient, 507
Geothermal systems, 510–512
Ghyben-Herzberg relation, 375
Gibbs free energy, 91
Glacial deposits, 149–152, 284–286
Glacial till, 150
Glacial-process models, 517–519
Glaciers, 517
Glaciotectonic structures, 518
Gradation curve, 350
Gradient:
chemical, 25, 103
electrical, 25
hydraulic, 16, 24, 72
thermal, 25, 507
Grain-size curve, 350
Grand Rapids, Manitoba, grouting, 481
Granite (see Igneous rocks)
Graphical presentation of hydrochemical data, 247-254
Gravel pack, 313
Gravity dam, 476
Groundwater:
in aeolian deposits, 149
age dating, 134-139, 201, 266, 290-292
in carbonates, 154-157
chemistry (see Hydrochemistry)
in coal, 157
confined (see Confined aquifer)
contamination (see Contamination of groundwater)
defined, 2
discharge (see Discharge)
exploration, 306-314
flow (see Groundwater flow)
in fluvial deposits, 147-148
geology, 145-166
as a geotechnical problem, 464-496
in glacial deposits, 149-152
in igneous and metamorphic rocks, 158-163
interaction with lakes, 226-229, 485-487
in permafrost, 163-165
quality, 385-388
recharge (see Recharge)
resource evaluation, 304-378
texts, 12
unconfined (see Unconfined aquifer)
utilization, 6
yield, 305, 313, 364-367
Groundwater discharge (see Discharge)
Groundwater divide, 194
Groundwater flow:
coupled, 25-26
equations of, 63-67, 316, 531-533, 549-553
into excavations, 491-496
in fractured rocks, 73, 154-162, 297, 408-413, 472-475
laminar, 72
macroscopic, 17, 69
microscopic, 17, 70, 75
multiphase, 45, 504
noncontinuum approach, 73
in petroleum migration, 503
regional (see Regional groundwater flow)
steady-state (see Steady-state flow)
Groundwater flow (cont.):
transient (see Transient flow)
into tunnels, 487-491
turbulent, 72
unsaturated (see Unsaturated flow)
Groundwater outcrop, 201
Groundwater recharge (see Recharge)
Grout curtain, 479
Grouting of dam foundations, 479-481
Gypsum, 108, 243, 280-284, 286
H
Half-reaction, 115-116 (see also Oxidation-reduction processes)
Halite, 244
Hammer seismic method, 308
Hantush-Jacob theory, 321
Hardness, 387
Head:
elevation, 21-23
hydraulic, 16, 18-26
pressure, 21-23, 39-41, 529
suction, 39
tension, 39
total, 22
Heat flow in the earth, 507
Heat transport in groundwater, 25, 507-510
Heavy metals, 416
Henry’s law, 95
Heterogeneity:
defined, 30
effect on transport of contaminants, 397-402
flow-net construction, 172-174
of fluvial deposits, 147
of glacial deposits, 150
regional flow systems, 197-199, 208-209, 397-399
of volcanic rocks, 161
Hillslope hydrology, 217-221
Hinge line, 194
Hct-water geothermal system, 511
Hvorslev piezometer test, 340
Hydraulic conductivity:
anisotropy, 32
of basalt, 29, 162
of coal, 157
from compaction recorder installations, 375
of crystalline rock, 29, 158
Hydraulic conductivity (cont.):
- defined, 16, 26–36
- effect on transport of contaminants, 397
- ellipsoid, 35, 175
- estimation from grain size, 350–351
- Fair-Hatch equation, 351
- of fluvial deposits, 29, 147
- of fractured rocks, 29, 154–162
- of glacial deposits, 29, 151
- heterogeneity, 30
- Kozeny-Carmen equation, 351
- laboratory measurement, 335
- loess, 29, 149
- of permafrost, 163
- from piezometer tests, 340–341
- from pumping tests, 349
- range of values, 29
- relationship with porosity, 38, 74
  - 351
- of sandstone, 29, 152
- of shale, 29, 158
- tensor, 35
- units, 23, 28–29
- unsaturated, 41–43, 212, 339

Hydraulic diffusivity, 61

Hydraulic dispersion, 75 (see also Dispersion)

Hydraulic gradient, 16, 24, 72

Hydraulic head:
- defined, 16, 18–26
- fluctuations, 229–234
- units, 22

Hydraulic potential, 18

Hydrochemical anomalies, 521

Hydrochemical equilibrium (see Equilibrium)

Hydrochemical facies, 250

Hydrochemical sequence, electrochemical evolution, 244–247

Hydrochemical sequence:
- electrochemical evolution, 244–247
- major ion, 241–244

Hydrochemistry:
- contamination, 384–457
- of crystalline rock, 268–274
- evolution, 238–297
- of glacial deposits, 284–286
- graphical presentation, 247–254
- of gypsum, 108, 243, 282

Hydrochemistry (cont.):
- of halite, 244
- hydrograph separation, 223
- indicators of streamflow generation, 221
- kinetics, 295–297
- order of encounter, 258, 280–284
- ore deposit exploration, 521
- petroleum exploration, 507
- principles, 81–141
- process rates, 295–297
- reaction rates, 295–297
- regional flow mapping, 201
- of shale, 280–284

Hydrodynamic dispersion (see Dispersion)

Hydrodynamic entrapment of petroleum, 504–506

Hydrogen isotopes, 82

Hydrogen sulfide, 87, 246

Hydrogeochemistry (see Hydrochemistry)

Hydrogeologic maps, 307

Hydrogeology, 145–166

Hydrograph:
- baseflow, 210, 225
- groundwater, 215, 231–232
- separation, 223, 225
- streamflow, 219–220, 225–226

Hydrologic budget:
- steady-state, 203–207
- transient, 365–367

Hydrologic cycle, 3, 193–229

Hydrotamal ore deposits, 513, 519

Hyperfiltration, 293

Hysteresis:
- in compressibility, 54
- in unsaturated characteristic curves, 42, 62

Index

I

Ignatovich-Souline sequence, 241–244

Igneous rocks, 158–163, 268–279, 512

Illinois State Water Survey aquifer model, 355

Image-well theory, 330

Imaginary impermeable boundary, 169, 176, 194

Imaginary wells, 331

Imbibition curve, 41

Immiscible displacement, 46, 385, 444

Impermeable boundary, 168, 330
Incompressible fluid, 52
Incongruent dissolution, 107, 257-259, 272
Induced infiltration, 369
Infiltration:
  defined, 211
  fluctuations in water table, 230
  induced, 369
  numerical simulation, 544-545
  recharge, 211-217
Infiltration capacity, 211
Influent stream, 205
Injection of waste, 454-456
Inorganic carbon, 86, 99, 101
Inorganic constituents of water, 85
Interflow (see Subsurface stormflow)
Intermediate flow system, 196
Internal friction, 466
Intrinsic permeability, 27
Intrusion of seawater, 375
Inverse problem, 356-359
Inverted water table, 45, 214
Ion complexes, 100
Ion evolution sequence, 241-244
Ion exchange:
  affinity for adsorption, 133
  cation exchange capacity, 128
  in glacial deposits, 285-287
  in groundwater contamination, 402
  principles, 127-134
  selectivity coefficient, 130
Ion pairs, 101
Ionic diffusion (see Diffusion)
Ionic strength, 90, 107
Irrigation water quality standards, 388
Isotherm, 403
Isotopes:
  environmental, 134-139, 201, 221-224
  of hydrogen, 82
  of oxygen, 137
  radioactive, 134-137, 290-292
  of water, 82
Isotopic fractionation, 138
Iterative numerical method, 183
IUPAC convention, 119

K
Kaolinite (see Clay minerals)
Karst, 513-515
Kielland table, 90, 537
Kozeny-Carmen equation, 351

L
Lakes, 226-229, 485-487
Laminar flow, 72
Land subsidence, 9, 57, 370-375
Landslides, 464-475
Laplace's equation, 64, 178, 195, 534, 540, 542
Lateral dispersion (see Dispersion)
Laterites, 519
Law of mass action, 89
Layered heterogeneity, 30, 197
Leachate, 435
Leakage from reservoirs, 477, 485-487
Leaky aquifer, 320-324, 345, 346
Leaky well function, 321
Lehman Caves, Nevada, 514
Liebmann method, 184 (see also Overrelaxation)
Limestone:
  caves, 513-515
  grouting, 479
  hydrochemistry, 108-112, 254-268
  280-284
  hydrogeology, 154-157
  karst, 513-515
Limit equilibrium methods, 467
Liquefaction, 483
Local flow system, 196
Loess, 149
Log-log type-curve matching, 343-347
Long Beach, California, land subsidence, 370, 373
Long Island, New York, artificial recharge, 369
Longitudinal dispersion (see Dispersion)
Lumped-parameter approach, 206

M
Macroscopic concept of flow, 17, 69
Major-ion evolution sequence, 241-244
Manitoban dolomite aquifer, hydrochemistry, 261-268
Manometer, 15, 23
Mass density, 19, 23, 52, 376, 529
Mass transport (see Transport processes; Contamination of groundwater)
Mathematical model, defined, 67
Maximum permissible concentration, 386, 425
Maximum stable basin yield, 364
Mechanical dispersion, 75 (see also Dispersion)
Membrane effects (see Semipermeable membrane)
Metamorphic rocks, 158–163
Meteoric water, 519
Meteoric water line, 139
Methane, 87, 118, 246, 439
Method of images, 331
Mexico City, land subsidence, 9, 370
Microorganisms, 121, 241
Microscopic concept of flow, 17, 70, 75
Mineral deposits, 519
Mineral dissolution (see Dissolution of minerals)
Miscible displacement, 46
Mississippi Valley lead-zinc deposits, 520, 523
Modulus of elasticity, 51
Mohr circle, 465
Mohr-Coulomb failure theory, 465–467, 499
Moisture content, 39–44, 186, 213–216
Molarity, 87
Molar fraction, 88
Molecular diffusion (see Diffusion)
Montmorillonite (see Clay minerals)
Multiphase flow, 45, 504
Multiple-well systems, 328
Musquoduboit Harbour, Nova Scotia, aquifer model, 357

N
Navier-Stokes equations, 17
Nernst equation, 121
Nitrification, 118, 413
Nitrogen contamination, 413–416
Non-Darcy flow, 72–74
Nonsteady flow (see Transient flow)
Nuclear fuel cycle, 447
Nuclear waste, 447–454
Numerical simulation:
aquifer, 352–359, 546–548
finite-difference, 181–184, 352–356, 540–541, 544–548
finite-element, 184, 356
groundwater contamination, 400–401
hillslope hydrology, 219
inverse, 356–359
regional flow, 197
steady-state, 181–185, 540–541
transient, 352–359, 544–548
unsaturated, 213, 544

O
Ohm’s law, 179
Oil and gas migration, 502–507
Oil spills, 444–447
Open-system dissolution, 109, 254–256
Optimal yield, 364
Order of encounter, 258, 280–284
Ore deposits, 519
Organic constituents of water, 86, 424–426
Organic matter, 241, 288, 424–426, 438
Organic water quality standards, 386
Osmosis, 105
Osmotic pressure, 105
Ottawa, Ontario, tritium in precipitation, 137
Overdraft, 364
Overland flow, 4, 211, 217–218
Overrelaxation, 184, 208, 355
Oxidation number, 114
Oxidation state:
defined, 114
rules for assigning, 114
table of values, 114, 125
Oxidation-reduction processes:
electrochemical evolution sequence, 244–247
nitrogen, 414
organic matter, 241, 288
principles, 114–116
trace metals, 417
Oxygen:
dissolved, 86, 95, 140, 245
isotopes, 137, 224
P
Parameter identification, 358
Partial area, 218, 221
Partial penetration, 329
Partial pressure, 95
Partially-saturated flow (see Unsaturated flow)
Particle mass density, 337
Partitioning of solutes, 402-408, 432-434
Parts per million, 88
Pathline, 51
pE:
  defined, 119-126
  evolution sequence, 244-247
  measurement, 141
  pE-pH diagrams, 123-126, 247
Peclet number, 392
Pennsylvanian carbonate aquifer,
  hydrochemistry, 261-268
Perched water table, 45, 48, 210
Permafrost, 163-165
Permeability:
  defined, 27
  effective, 46
  specific, 27
  units, 28-29
  (see also Hydraulic conductivity)
Permeameter, 335-336
Pesticides, 386, 425, 443
Petroleum migration, 502-507
Petroleum spills, 444-447
pH:
  in carbonates, 108-111, 257-264
  defined, 98
  measurement, 140
  pE-pH diagrams, 123-126, 247
Phenomenological coefficients, 26
Phreatophytes, 201, 207, 231
Piezometer, 23, 177, 200, 234, 339-342
Piezometer nest, 24, 200
Piezometer tests for hydraulic conductivity, 339-342
Piezometric surface (see Potentiometric surface)
Pine Point lead-zinc mine, North West Territories, 492, 521
Piper trilinear diagram, 249, 252
Piping, 477, 482
Pluton emplacement, 512
Point-dilution method, 342, 428
Pollution of groundwater, 8, 385 (see also Contamination of groundwater)
Polyprotic acid, 99, 423
Ponding, 213-214
Pore pressure, 468
Porosity:
  areal, 70
  defined, 36-38
  fracture, 74-75, 408
  laboratory measurement, 337
  primary and secondary, 36-37
  range of values, 37, 149, 152, 155, 158
  relationship with hydraulic conductivity, 38, 74
  volumetric, 70
Potential, fluid, 18
Potential evapotranspiration, 207
Potentiometric surface, 49, 318, 345
Prairie profile, 203
Precipitation:
  chemistry, 238
  in hydrologic budget, 205-206
  in hydrologic cycle, 4
  as infiltration, 212
Pressure:
  air-entry, 41
  atmospheric, 19, 21, 39, 230, 233
  bubbling, 41
  fluid, 19-23, 529 (see also Pressure head)
  osmotic, 105
  partial, 95
  pore, 468
  uplift, 477, 480
  vapor, 95
Pressure head, 21-23, 39-41, 529
Primary migration of petroleum, 503
Primary porosity, 36
Principal directions of anisotropy, 32
Principal stresses, 465-468
Proton transfer, 83
Pumping tests, 343-350

R
Radial flow to a well, 315-331
Radiation log, 312
Radioactive waste, 447-454
Radioactive water quality standards, 386
Rain chemistry, 238
Rainfall (see Precipitation)
Rangely, Colorado, earthquake experiments, 502
Reaction quotient, 112, 132
Recharge:
  air entrapment, 231
  area, 193-195, 203-207, 211, 229
defined, 211
depression-focused, 217, 228
fluctuations, 229
in hydrologic budget, 203-207, 365
infiltration, 211-217, 544-545
Recharge area, defined, 193
Recharge-discharge profile, 203
Recovery of well after pumping, 329
Redox potential, 120, 245
Redox processes (see Oxidation-reduction processes)
Redox reaction, 115
Reduction (see Oxidation-reduction processes)
Refraction of flowlines, 172, 197
Refractory compounds, 426
Regional groundwater flow, 193-211, 401-407, 506, 542-543
Relative concentration, 391
Relaxation, 183 (see also Overrelaxation)
Representative elementary volume, 70
Reservoirs, 477, 485-487
Residence times, 5
Resistance network, 180
Resistance-capacitance network, 360
 Resistivity log, 310
 Resistivity survey, 309
Retardation, 404-410, 552
Retardation factor:
  defined, 404
effect on concentration gradients, 406-408
in fractured rocks, 410
measurement, 432-434
Revelstoke dam, British Columbia, 10
Reverse-rotary drilling, 313
Reynolds number, 72
Richards equation, 67, 212, 544
Rocky Mountain Arsenal disposal well, Colorado, 500
Rotary drilling, 313
Runoff (see Streamflow)
S
Safe yield, 364
Safety factor for slopes, 470, 472
Salt filtering, 293-294
Salting-cut effect, 96
Saltwater intrusion, 375-378
Saltwater-freshwater interface, 376
Sen Jacinto tunnel, California, 9, 490
San Joaquin valley, California, 148, 370
Sandstone, 152-154, 280-284
Sanitary landfills, 434-442
Santa Clara valley, California, land subsidence, 373
Saturated zone, 39, 44, 185
Saturation distance, 296
Saturation index, 112, 263, 281, 283
Scale factors, electric analog, 361
Scanning curve, 41
Schoeller semilog diagram, 249
Seawater intrusion, 375-378
Secondary migration, 503
Secondary porosity, 37, 155
Seepage:
  beneath dams, 50, 68, 171, 477-481
  through earth dams, 481-485
  into excavations, 491-496
  into tunnels, 487-491
Seepage face, 186
Seepage force, 482, 516
Seismic refraction, 310
Selectivity coefficient, 130
Selectivity function, 130
Semilog diagram for hydrochemical data, 249
Semilog type-curve matching, 347-348
Semipermeable membrane, 104, 292-295
Septic tanks, 439
Sewage, 439-442
Shale, 158, 280-284
Shear strength, 466-467
SI units, 526-528
Slab and buttress dam, 476
Sleepers River watershed, Vermont, 220
Slope stability, 464-475, 516
Slug test, 339
SMOW, 137, 224
Snow chemistry, 238
Soil moisture (see Moisture content)
Soils map, 306
Soil-water diffusivity, 62
Solid wastes, 434-442

Solubility:
- of aluminosilicates, 106-107, 274
- of carbonates, 108-112, 259, 288
defined, 106
- effect of temperature, 109, 258
- of gypsum, 108
- of halite, 106
- of pesticides, 425
- principles, 106-114
- of quartz, 106
(see also Dissolution of minerals)

Solute, defined, 87
Solute, defined, 87

Specific capacity of a well, 313
Specific discharge, 16, 23, 24, 71
Specific gravity, 529
Specific moisture capacity, 62, 212
Specific permeability, 27
Specific storage, 58
Specific yield, 61
Spontaneous potential log, 310
Spreading basin, 369
Springs, 201, 262
Stability constant (see Equilibrium constant)
Stability field, 125, 277, 417-419
Standard free energy of formation, 93
Standard free energy of reaction, 93
Standard mean ocean water, 137, 224

Steady-state flow:
defined, 49
flow nets, 168-188
Laplace's equation, 63-64
numerical simulation, 181-185, 540-541
regional, 193-207
seepage through earth dams, 481-485
seepage into tunnels, 487-491
Stepped pumping rate, 328
Stiff diagram, 248
Stockholm convention, 119
Storage coefficient (see Storativity)

Storativity:
defined, 59-61
from pumping test, 343-350
range of values, 60
Stream morphology, 516
Stream-aquifer interactions, 206, 209-210, 222, 225-226, 370, 516

Streamflow:
- baseflow, 4, 206, 209-210, 222, 225-226
- fluvial geomorphology, 516
- generation, 217-226
- hydrograph, 219-220, 225-226
- in hydrologic budget, 206
- in hydrologic cycle, 4
- induced infiltration, 370
Streamflow generation, 217-226
Streamlining potential, 293
Streamtube, 169

Stress, effective (see Effective stress)
Stress-strain relations, 51-58, 66, 74, 465-467, 529
Structural geology, 145, 307, 474, 498-502
Subsidence (see Land subsidence)
Subsurface stormflow, 4, 217, 219-221
Successive overrelaxation, 184, 208, 355
Suction head, 39 (see also Pressure head)
Sulfate reduction, 118, 244, 246
Supergene enrichment, 519
Supersaturation, 113, 264, 266
Syncline, 156

T

Tangent law, 172, 197
Teccolte tunnel, California, 489
Temperature distribution in groundwater, 508-510
Tensiometer, 39
Tension head, 39 (see also Pressure head)
Tension-saturated zone, 44, 213
Test-drilling, 307
